

Instructions de montage support d'appareils | Istruzioni di montaggio supporto apparecchi

Mur en brique avec sortie de tube.

Adapter la profondeur du support à l'épaisseur de l'isolant en choisissant les éléments appropriés.

Enlever la partie frontale de l'élément frontal.

Enlever le couvercle de la cheville expansible.

Muro in mattoni con uscita di un tubo

Adattare la profondità del supporto allo spessore della coibentazione con gli elementi adatti.

Togliere il frontalino dall'elemento frontale.

Togliere il coperchio dalla caviglia espansibile.

Enlever la cheville de la patte latérale. Observer les longueurs différentes.

Plier et enlever l'éclisse aux extrémités de l'élément frontal.

La longueur de la cheville doit dépasser la profondeur du support de 30 mm.

Introduire la cheville convenante dans l'orifice prévu.

Togliere la caviglia dalla parte laterale. Osservare le lunghezze differenti.

Piegare la linguetta e toglierla dal elemento frontale.

La lunghezza della caviglia deve superare lo spessore del supporto di 30 mm.

Inserire la caviglia adatta nell'orificio previsto.

Forer un trou de Ø 8 mm et profondeur de 60 mm au minimum.

Ajuster le support d'appareils contre la paroi et fixer à l'aide de la cheville à visser. Insérer le bouchon.

Presser le tube dans la guide latérale et adapter en longueur.

Insertion facile du tube qui est protégé contre l'arrachage par un ergot de maintien.

Praticare un foro Ø 8 mm e con profondità di almeno 60 mm.

Disporre il supporto sulla parete, posizionarlo e fissarlo con un colpo di martello. Inserire il tappo.

Inserire il tubo nella guida laterale e tagliarlo a misura.

Il tubo si inserisce con facilità e viene bloccato in posizione dagli appositi passanti.

Lors du montage d'un tube M25 il faut préalablement enlever la bague de réduction de l'élément frontal.

Remplacer le couvercle de la cheville avec „Click“ audible. L'extrémité du tube est recouvert.

Encliquer la partie frontale désirée.

Film de montage

Film del montaggio

Utilizzando tubi M25 è necessario asportare innanzitutto l'anello di riduzione dell'elemento frontale.

Rimontare il coperchio del tassello premendolo fino a udire un netto clic.

Applicare il frontalino adeguato.

Montage Systemgeräteträger / Assembly instructions

Backsteinmauer mit Rohraustritt.

Brick wall with tube outlet.

Geräteträger durch die passende Wahl von Bauteilen an Dämmstärke anpassen.

Adapt the depth of the carrier to the insulation thickness selecting the appropriate components.

Frontteil von Frontelement abheben.

Remove the front section of the front element.

Dübel-Abdeckung entfernen und nach vorne ausfahren.

Remove the cover of the ETICS anchor.

Schraubdübel den Seitenlaschen entnehmen. Beachten Sie die unterschiedlichen Längen!

Pull out the anchors and notice that they have different lengths.

Laschen oben und unten abknicken.

Remove the guides from the top and bottom of the front element.

Der Dübel muss den Aufbau des Geräteträgers um 30 mm überragen.

The anchor must be 30 mm longer than the carrier.

Passenden Dübel durch die vorgesehene Öffnung einführen.

Insert the suitable anchor into the designated opening.

Ein Loch mit $\varnothing$ 8 mm und einer Tiefe von mindestens 60 mm bohren.

Drill a hole with $\varnothing$ 8 and a depth of at least 60mm.

Geräteträger an die Wand halten, ausrichten und mit Dübel befestigen. - Stopfen einsetzen.

Hold the carrier to the wall, align it and hammer the anchor into the brick wall. - Slip in the plug.

Das Rohr in die seitliche Führung drücken und ablängen.

Feed the tube into the lateral guide and cut it to length.

Das Rohr lässt sich leicht seitlich einführen und ist mit Rippen gegen Ausreißen gesichert.

The tube can be fed easily through the guide. Ribbings hold it firmly in place.

Bei der Montage von Rohren M25 muss vorgängig der Reduktionsring am Frontelement entfernt werden.

Before feeding an M25 tube, remove the reduction ring.

Dübelabdeckung wieder anbringen - ein "Klick" muss hörbar sein. Rohrenden werden abgedeckt.

Press the cover of the anchor back into place until a „click“ is heard. Tube endings are covered.

Gewünschtes Frontteil aufklicken.

Press the required front element into place.
