Product datasheet:

UP[1] Fix stepless plaster compensation frame

UP[1] Fix stepless plaster compensation frame

· To compensate for deep-seated boxes
· To maintain IP protection class
· With 2 fixing screws 40 mm
· Check compatibility when installing large built-in appliances

Infinitely adjustable plaster compensation frame for flush-mounting/masonry installation, plaster compensation frame for flush-mounting device boxes UP1 Fix and UP1 ECON® Fix in accordance with DIN EN 60670/VDE 0606 and DIN 49073, made of plastic, installation opening Ø 60 mm, depth 10-35 mm, infinitely adjustable, protection class IP 20 according to DIN EN 60529, flame retardant according to DIN EN 60695 up to 650° C, halogen-free according to DIN VDE 0604-2-100, for flush-mounting installation, with 4 x 3 screw domes, with 2 device screws

Article number:	**1155-65**
EAN:	4013456587380
Inner packing / Packaging quantity:	10 / 100

Planning data

Assembly / Installation

Assembly type:	UP (solid construction)

With the newly developed plaster compensation frame, even accessories in boxes that are installed too low can be installed flush with the wall and in compliance with standards. Also ideal for renovations. The plaster compensation frame is stepless adjustable and can therefore, e.g. bridge retrofitted wall plaster or tiled walls professionally. Due to the stepless immersion into the box, compatibility must be checked prior to installation for devices that take up the maximum installation space, such as SCHUKO sockets with USB charging function, dimmers, etc.
Alternatively, the plaster compensation rings 1155-61 or 1155-62 can be used.

· To compensate for boxes that are positioned too low
· Continuously adjustable from 10 - 35 mm
· Installation accessories can be installed directly with the compensation frame or retrofitted
· Including screws 40 mm, Pozidriv drive
