

Product datasheet:

Magnet MV Wall-ceiling transition boxes

Magvast concrete system junction boxes

- High adhesive strength.
- Suitable for Magvast recessed boxes.

Article number: **↗ AT4856**

EAN: 8712259279978

Assembly / Installation

Assembly type: BB (solid construction)

Safety / Properties

Special application: on-site mixed concrete

ETIM Product classification:

Accessories/spare parts for junction boxes/cases for mounting in the wall

Type of accessory/spare part:

Accessory: No

Spare part: No

Suitable for built-in installation box: No

Suitable for central conduit box: No

Attema's Magvast® concrete construction system is used mainly in concrete factories, but also on building sites. Magvast® works with magnets that are clamped into the boxes to prevent concrete water from entering the boxes.

After measuring, the magnets are placed on which the box is then placed. After the formwork is removed, the magnet remains behind on the steel table or formwork, after which it can be removed and reused. Magvast® is then ready for the next cycle. It is a flexible system that does not damage the formwork.

Attema has magnets for various types of boxes in its range. Magnets have a high clamping force (>100 kg).

Suitable for steel formwork.

Attached without drilling, so no damage to the formwork.
