

Product datasheet:

MV50 Magvast junction box Ø 20 mm

Magvast concrete system junction boxes

- 2 conical tube entries with tube snapper; one of which is closed by a breakout port.
- Including 2 M3 x 12 mm screws.

Article number:	⇒ AT4811
EAN:	8712259269542
Packaging quantity:	100

Assembly / Installation

Assembly type:	BB (solid construction)
----------------	-------------------------

Safety / Properties

Halogen-free:	Yes
Special application:	on-site mixed concrete

Attema's Magvast® concrete construction system is used mainly in concrete factories, but also on building sites. Magvast® works with magnets that are clamped into the boxes to prevent concrete water from entering the boxes.

After measuring, the magnets are placed on which the box is then placed. After the formwork is removed, the magnet remains behind on the steel table or formwork, after which it can be removed and reused. Magvast® is then ready for the next cycle. It is a flexible system that does not damage the formwork.

Attema has magnets for various types of boxes in its range. Magnets have a high clamping force (>100 kg).

Suitable for steel formwork.

Attached without drilling, so no damage to the formwork.
