

## Product datasheet:

# Primer 250 ml, solvent-free

## KAISER primer

- The self-adhesive primer is water and heat resistant. It can also be used on Styrofoam, EPS, XPS etc.
- Contents: 250 ml

Primer for optimising the adhesion of all KAISER air-tight sleeves for indoor and outdoor use on absorbent, mineral substrates such as masonry, concrete, plasterboard or wood-based materials. The self-adhesive adhesive primer is water and heat resistant and can also be used on Styrofoam, EPS or XPS, for example.  
Processing temperature from +5 °C.

**Article number:**  **9000-02**

**EAN:** 4013456537552

## Assembly / Installation

**Assembly type:** HW (drywall/lightweight construction)

## ETIM Product classification:

### Adhesive

| Volume:              | 250 ml |

KAISER primer is a high-quality, solvent-free coating which optimises adhesion for all KAISER sealing sleeves on absorbent, mineral surfaces, for example masonry, concrete, plasterboard or wood materials. The self-adhesive primer is water and heat resistant. It can also be used on Styrofoam, EPS or XPS etc.
