

Product datasheet:

System magnet adapter for the inclined support attachments for PFEIFER

System magnet adapter for the inclined support fixing

- For the automated and precise positioning of all standard inclined support anchors and mounting dowels
- Slot for system magnet (Art.-No. 1299-69) and system magnet PLUS (Art.-No. 1299-70)

Article number:	1200-05
EAN:	4013456593336
Packaging quantity:	1000
Price group:	130

Assembly / Installation

Assembly type:	BB (solid construction)
----------------	-------------------------

Safety / Properties

Special application:	precast concrete
----------------------	------------------

Features

Suitable for manufacturers:	PFEIFER
-----------------------------	---------

In addition to the electrical installation components in concrete wall production, there are new system magnet adapters for the automated integration of the mounting dowels for installing the wall elements on the construction site into the factory production process. These are matched to the available inclined support attachments on the market and thus enable the complete factory integration of all components required for a wall element.

- Patented system magnet locking mechanism for a secure fit on the system magnet when an inclined support attachment is attached
- Easy placement on the system magnets and simple removal after formwork removal
- The system magnet adapter protects the system magnets from the effects of concrete
- Secure and concrete-tight connection to the mounting dowel
- Tapered contour for the adapter to remain securely on the formwork table
