

Product datasheet:

Wall and ceiling transition for M25 conduits, without special adhesive

Wall and ceiling transition

- for fitting to formwork edging
- with moulded-in measurement strip to achieve the exact installation height in 5 mm steps
- with closing cover to prevent ingress of material

Concrete construction, wall-ceiling transition, for 25 mm conduits, with closing cover, 1-piece

Wall-ceiling transition for concrete construction installation, precast concrete, adhesive attachment to steel formwork

Wall-ceiling transition for connecting rigid and flexible installation conduits 25 mm or as wall or ceiling exit, made of plastic, can be closed on the formwork side with a closing cover, for the continuous [EMPTY] fitting of conduits at transitions of precast concrete elements

For installation on side formwork, with integrated measurement strip for precise installation in edge areas, adjustable in 5 mm increments, flame-retardant according to DIN EN 60695 up to 650° C, halogen-free according to DIN VDE 0604-2-100, for precast concrete construction installation

Planning data

Article number: **1261-12**

EAN: 4013456151413

Packaging quantity: 100

Price group: 140

Connections / Entries

For conduit Ø: 25 mm

Assembly / Installation

Assembly type: BB (solid construction)

Safety / Properties

Special application: precast concrete

Wall and ceiling transition for uninterrupted conduit connections and wall and ceiling exits. The exact distance to the formwork edgings can be set and fixed in 5 mm increments with the integrated measurement strip.

- For secure conduit connections on prefabricated concrete elements
- For fitting to formwork edging
- For rigid and flexible DIN EN conduits Ø 25 mm
- For locating exact height thanks to integrated measurement strip
