

Product datasheet:

SPECIAL cutter METAL Ø 68 mm with holder and centering drill

SPECIAL cutter

- specially for sheet metal panelling made of unalloyed/alloyed steels, non-ferrous metals
- Fine bi-metal toothing 10 teeth pi
- special centering drill for exact drilling
- Fits all electric drills with 13 mm chuck

Article number:  **1086-68**

EAN: 4013456588073

Packaging quantity: 10

Price group: 170

Dimensions / Form

Drill/cut hole Ø: 68 mm

Drilling/cut hole depth: 32 mm

Features

With ejector: Yes

The SPECIAL cutters are the ideal tool for creating installation openings in demanding materials. Specially developed for processing metal and wood materials, it ensures precise and professional installation.

- METAL cutter with fine toothing
- for smooth running and precise holes
- MDF cutter with carbide teeth
- for fast cuts and long operating life
