

Product datasheet:

Earthing cleat 1 ½ - 2"

Earthing and equipotential bonding

- for 4 to 50 mm² cables or circular conductors up to Ø 8 mm
- low contact resistance due to two terminals

Article number:	9620
EAN:	7611614031293
Packaging quantity:	10
Price group:	220

Connections / Entries

For conduit Ø:	7 mm
For conductor Ø:	8 mm

Tinned brass earthing clamps provide a secure connection to metal piping for water or heating supply and connect it to the main equipotential bonding.

- For connecting metallic conduits to the main potential equalisation point
- Durable contact between conduit and potential equalisation conductor
- Two contact screws provide large conductor contact surface
- Easy connection of multiple adjacent conduits to the potential equalisation point without interrupting the potential equalisation conductor
- Potential equalisation is not interrupted when removing a conduit
