

## Product datasheet:

# Plaster compensation ring 25 mm round junction boxes

## Central junction boxes concrete ceiling

- Fitted with inserts and pre-assembled M4 screws.
- Stackable underneath.
- Universally applicable on any round central box.

### ETIM Product classification: Plaster compensation ring

|                   |                     |
|-------------------|---------------------|
| Levelling height: | 25 mm               |
| Length:           |                     |
| Width:            |                     |
| Diameter:         |                     |
| Shape:            | Round               |
| With cover:       | No                  |
| Application:      | Central conduit box |
| Mounting method:  | Concrete building   |
| Extension ring:   |                     |

The concrete ceiling junction boxes are specially developed for the installation of conventional systems in concrete ceilings. These junction boxes are equipped with combi-inlets combined for 16 mm and 19 mm conduits. The ceiling junction boxes Concrete are used in solid floors and concrete hollow-core floors, or precast slab floors.
