

Product datasheet:

P25 Trunking base + cover, 2 m black

P25/K25 Trunking system (Flat-tube system)

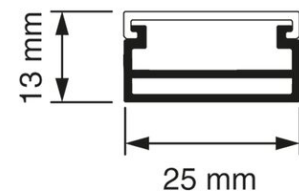

- Quick installation due to attachment holes in 'double' bottom.
- Alignment correction possible thanks to slot and hole pattern in bottom.
- Internal dimensions: 23 x 8 mm

Article number:  **AT9264**

EAN: 8712259633664

P25 and K25 are the surface-mounted systems for user-friendly and safe cabling. The cable duct system has a slim and modern design and is suitable for laying complete surface-mounted installations. The unique double bottom construction of the P25 duct allows screw heads to sink safely into the bottom, providing optimum protection for up to 5 VD wires of 2.5 mm². The system is easy to expand with other matching products from the surface-mounted series. All products have the same compact dimensions and are KEMA-approved.
