Product datasheet:

Z25 and F25 are the most popular surface-mount systems for installation-friendly data cabling. The clever accessories make it possible to use the entire volume of the ducts for data cables up to Ø 10 mm. Every accessory ensures a minimum bending radius of 25 mm. The clickers and guide pieces make installation quick and easy. The special cover makes the F25 ideal for public areas, such as in Fibre to the Home projects in high-rise buildings and stairways. Since the cover is difficult to remove, it cannot be opened by unauthorised persons and, therefore, the chance of interference in telephone, Internet and television signals is reduced.
