

Product datasheet:

Patch cabinet specs, black

Patch cabinet, Data

Article number: **GD AT1881**

EAN: 8712259272672

Dimensions / Form

Product width: 115 mm

Product depth: 115 mm

ETIM Product classification:

Patch panel copper (twisted pair)

Number of buses/couplings:

Suitable for number of connectors:

Type of connector:

Screened:

Category:

Connection type:

Number of height units:

Colour: Black

RAL-number:

Mounting method:

Height: 220 mm

Width: 115 mm

Depth: 115 mm

Compatible with Grade2TV according to XP-C 90-483:

Compatible with Grade3TV according to XP-C 90-483:

Assembly instructions

The patch cabinet was specially developed for the connection (patching) of active communication equipment in the meter cupboard to the connection points in the rooms. The cabinet provides ease-of-installation for the technician and great convenience for the user. The installer supplies structured, tested data cabling to the connecting points. The user can move patch cables to change the connections as needed. Thanks to its compact size, the cabinet fits well in the often cramped confines of the meter cupboard. The angled position of the connectors ensures that the patch cables can be installed in a trouble-free, well organized manner and that the labels are easily readable. The number of connectors can be expanded easily by adding adapters with corresponding connectors. With the patch cabinet, you have a simple, future-proof solution available for your clients' network cabling.
